

Project Management

The Team That Delivers Excellent Customer Care

Our Team of Project Managers approach is simple: We listen to the needs of our clients, provide honest, accurate, timely information, and adjust where necessary. TAMS have exceptional qualifications in leading, managing, coordinating, organizing, and overseeing all types of projects, facilities, scopes and technical requirements. Our methodology consists of a collaborative system with customer satisfaction being our goal. We will coordinate all services with the appropriate designated point(s) of contact (POC) and continuously communicate with the POC so that the client is aware of all current activities, future planning, recommendations, and team performance.

TECHNICAL EXPERTISE: The objective as a TAMS Project Manager, TA Management Solutions LLC (TAMS) will act as an extension of the client, the facility and administrative teams. TAMS provide highly experienced planners and teams to respond to only the required task order work to eliminate redundancy with the client's team.

METHOD: Through the combined experience of TAMS, our team has created proven and practical methodologies for project process. When implemented, our tasks focus on accommodating special requirements of the facility environment and ensure research and daily business operations remain on schedule.

These methods are followed by conducting a formal "discovery" process to understand research, mission, create the plan to address operational linkages/dependencies between departments, building milestones as and when needed, IT infrastructure implantation and systems migration, sequence of events, identify major risks, develop contingency plans, follow security protocols, and provide project plans in a MS Project Schedule, and follow plans and project schedules until completion.

You Have a Winning Team with TAMS.
